## Portable Stairway

This 4 inch maple cube unfolds repeatedly and creates a wooden vertical spiral stairway, including hand rail, of up to 100 feet total length. It may have a maximum width of 10 feet wide and a minimum of one foot wide. The stairway has a load capacity of one ton. It must have a firm location to mount at the start, but not necessarily at the other end. The command word is "Unlimited" and the dimensions must be stated to create the staircase. Speaking the word "Limited" causes the staircase to fold back into the cube. If someone or thing is on the stairs at that time, they are dumped unceremoniously upon the ground. Normal falling damage applies. Its use requires a standard action. The staircase may be used twice per day.
